# **TRS1/1**

#### 3. ELECTRICAL CHARACTERISTIC :

3-1. IMPEDANCE : 0 1 KHZ/0.25 URMS.

1-3 : 600 OHM (LOAD) 4-6 : 600 OHM ± 10 %

## 3-2. D.C. RESISTANCE :

1-3 : 58 OHM ± 18 % 4-6 : 68 OHM ± 18 %

### 3-3. HI POT TEST :

WINDING TO WINDING : AC 588 V 3 mA, FOR ONE MINUTE.

WINDING TO CORE : AC 250 V 3 mA, FOR ONE MINUTE.

## 3-4. INSULATION RESISTANCE :

THE INSULATING RESISTANCE BETWEEN COIL TO COIL AND COIL TO CORE MEASURED BY DC 500 V INSULATION RESISTANCE METER SHOULD BE OVER 100 MOHMS.

## 4. ENVI RONMENTAL/PHYSICAL:

4-1. TEMP. RANGE: -20°C~80°C (AMBIENT TEMP).

## 4-2. HUMIDITY:

AT  $48 \pm 2^{\circ}\text{C}$   $90 \sim 98 \times$  RH. PUT THE TEST MATERIAL IN A CONSTANE . & HUMIDITY TANK FOR  $96 \pm 4$  Hours, and then take out to put it in a room of normal temp. & Humidity Wiping away the brops of water. When testing for one hour, should meet the requirements of item 3-3 & 3-4 and there shall not be any abnormality.

## 4-3. HIGH TEMP :

AT 88  $\pm$  2°C IN A CONSTANT TEMP. TAKE FOR 24 HOURS, AND THEN TAKE OUT TO FOR ONE HOUR BEFORE TESTING, SHOULD MEET THE REQUIREMENTS OF ITEM 3-3 & 3-4. THERE SHALL NOT BE ANY ABNORMALITY.
