

MAGICAL DIMMER MODULE

VM135

AC 220 - 230V

This **Magical Dimmer** fits easily into your existing electrical wiring. Just put in series with one of the lamp wires and you are set.

Now using your regular switch it is possible to set a dimming intensity for your light, creating a suitable atmosphere.

HOW? It's Magic; 

1. Turn on the light as before.
2. When the desired intensity is reached, simply turn off/on and the setting will be remembered by the **Magical Dimmer**.

Characteristics:

- ☑ Microcontroller circuit, fit for light bulbs and mains halogen lamps.
- ☑ Install the module in the (existing) lighting circuit and you're done!
- ☑ Soft-start function prolonging the lamps' lifespan.
- ☑ Installs behind switch, sealing, inside lamp fixture...

Specifications:

- Power supply: 220-240V AC (50Hz)
- Load: 40 to 200W max.
- Dimming speed (0 -> max.): 5 sec
- Dimensions: 39 x 39 x 27 mm.
- Total weight: +/- 75 gr.
- Radio and TV interference suppression
- Max. ambient temperature: 40°C
